KUDZU VINE—This very luxuriant, rapid growing vine is of Japanese origin and is becoming very popular, both as a quick growing ornamental vine or screen for porches, lattice work, etc., and as a forage crop for cattle and hogs. The vines make a growth of 40 to 60 ft. in one season, furnishing an abundance of pasture. It forms a tuberous root which is hardy everywhere, and as it is a legume just as Soy Beans or Alfalfa, it acts as a soil rejuvenator by adding nitrogen. **PRICE:** strong roots 15c each; \$1 per doz.; \$7.50 per 100; \$70 per 1000.

The Loganberry-- A hybrid between the Raspberry and the Blackberry. The fruit is as large as the largest Blackberry, and is produced in immense clusters. The color is clear, dark red. It partakes of the flavor of both Blackberry and Raspberry—mild, pleasant, vinous flavor, delicious and peculiar to this berry alone. Seeds small, soft and few. Berries very firm and carry well. Strong grower; enormous bearer. Fruit ripens early, just after Strawberries. Not hardy north of 40th parallel without protection.

PRICE—15c Each; \$12.50 Per 100
